

Hub Group powers the automotive industry's strongest supply chains. With each component of our operations working in harmony, we drive development on transportation solutions that are custom built for our customers' unique needs. We offer unparalleled service and support, backed by 45 years of hard-won experience. As one of the largest intermodal marketing companies in North America, we boast the expertise and expansive fleet needed to deliver exceptional end-to-end service and ensure your freight arrives intact and on time. How do we do it?

CAPACITY

We've got the muscle to move your freight and the expertise to do so in a way that works best for your business, whether that's intermodal, highway or logistics. Hub Group utilizes 32,000 containers, 25 terminals spread across the United States, 2,700 drivers and an asset and non-asset over-the-road network. We also have extensive experience in logistics across all automotive sectors, including OEM and Tier 1 and 2 parts suppliers in NAFTA markets.

DEDICATED CUSTOMER CARE

Our Customer Care team is immersed in the automotive sector. Proactive and solutions-focused, their priority is ensuring timely deliveries on all loads. With bilingual team members and cross-border experience, they're ready to protect your goods whether they're headed to Mexico, the United States or Canada.

SECURITY

Our containers are outfitted with the latest theft-deterrents and come equipped with advanced GPS monitoring that provides detailed insight on your shipment's status and location. We work closely with carriers to proactively address security concerns before they escalate, and our dedicated security team actively engages with railroad and motor carrier personnel to assess any potential transit risks.

TECHNOLOGY AND VISIBILITY

We detail real time in-transit progress through Mission Control, our satellite tracking technology and HubPro, our application for tracking shipments and calculating up-to-the-minute ETAs. We strive for proactive communication and offer EDI connectivity, which provides tender payment and track-and-trace records, to ensure you have all the information you need to make pivotal transportation decisions.

FLEXIBILITY

If you've got a transportation problem, we've got a solution. We specialize in creating tailor-made service options, building each offering around our customers' specific transit concerns. Our extensive list of services include intermodal, highway, team truck, LTL, regional trucking, cross-border moves, transload and service recovery, as well as project, campaign and recall management.

Hub Group is the engine behind the automotive industry's strongest transportation solutions, engineering optimal answers for all your supply chain concerns. Whether you're looking to address untenable inbound and outbound logistics costs or refine your just-in-sequence operations, Hub Group has you covered.
